Dígito errado no Schema do Swagger

Acredito que o endpoint de Deletar conta do usuário deveria ter a rota /api/users ao invés de /api/profile devido ao tipo de entidade que está relacionada.

O endpoint /api/profile/user esta fora de padrão, se tiver que ter a rota com as duas entidades entende-se que a entidade User é dominante em relação a de Profile, um usuário pode ter um perfil mas um perfil só existe se tiver um usuário.

API de Autenticação retorna null quando seleciona usuário que foi apagado, acredito que deveria retornar 404 ou 422 na API

```

API de remover Usuário retorna que o usuário foi removido depois de já ter sido deletado, aparentemente não tem alguma lógica para validar se o JWT expirou ou não:

API de Selecionar Perfil de Usuário Logado retorna mensagem inconsistente, o usuário já foi excluído e retorna que não há perfil para este usuário:

```
GET /api/profile/me HTTP/1.1

Acredito que deveria retornar um 404 ou 422 em relação ao usuário não existir mais
